Position Opening: Graduate Technology Research Assistant

Overview
CECEI is seeking a Research Assistant who will primarily assist with an app project and the production of an iBook-based curriculum. App-related tasks include: performing research focusing on best practices for design, development (including programming), and maintenance, and research on other apps as well as app testing. iBook tasks include working with a team on assembling iBook(s), ensuring adherence to layout design, and working with a team to obtain photos and prepare/enhance them for the iBook. There may be other RAs working on these iBook tasks.

Position Details
- Research Assistants will be expected to work at CECEI approximately 10 hours per week
- Compensation will be course credit
- Priority will be given to applicants who are available/interested in working for 2 consecutive semesters

Additional Information
This position may also assist with other technology-related tasks. One additional task may be suggesting and implementing enhancements for the CECEI website. We are using a Drupal-based content management system and would like to improve the appearance and functionality of some or all web pages from a design standpoint. Another task may be designing other assets for CECEI as needed, such as print/marketing materials, reports, and media templates.

For best consideration, please send all materials by April 19, 2018. Please contact us with any questions or for more information. To apply, please email a resume, cover letter, and unofficial transcript to David Patton at CECEI@umd.edu, with the subject line “CECEI Technology RA 2018.”
