

Caregiver Training of Autism Intervention

Are you a parent of a 2- to 15-year-old autistic child or on a waitlist for autism diagnosis? We invite you to participate in our research that will train caregivers to use evidence-based intervention strategies at home.

The study will take place all online via Zoom for approximately 2 months.

1. Pre-study questionnaire (40 minutes)
2. Post-study questionnaire (5 minutes)
3. Caregiver training for learning how to use culturally adapted intervention strategies over zoom (about 20 sessions, varies from 15 to 30 min a session)

All Zoom sessions will be video-recorded. Permission to record is required for participation.

You will receive a total of \$50 Amazon gift card for your participation in completing the study.

To learn more about the study, please email us at accel@umd.edu with the title, "Caregiver Training".
