

## PROJECT 3

# We Are Artists

### **Goal**

Children create visual artwork that reflects their own individuality, and represents how they see the world around them.

### **What**

In *We are Artists*, children explore how to make collages, sculptures, or paintings using lines, shapes, textured materials, colors, or physical movements.

### **Why**

As children explore and manipulate art tools and materials, they can express their unique ideas, feelings, and imagination.

### **Community**

To inspire their creativity, children observe the artwork of well-known artists and collaborate with peers to make art in different ways.

### **Family**

Family members help their child look for art in their community, talk about their own artwork, and make art together.
