

PROJECT 8

We are Gardeners

Goal

Children investigate the parts of a fruit, how fruits look, taste, feel, and smell, and how fruits grow.

What

During *We Are Gardeners*, children observe a fruit's peel, flesh, and seeds, and describe its taste when fresh, cooked, or dried.

Why

Children use their senses to explore the smells, tastes, colors, and textures of fruits.

Community

Children talk with an expert gardener and visit a fruit farm to see how fruits are grown.

Family

Family members play "I Spy" at a garden center, observe a fruit turning ripe, and make blueberry milk.
