

COLLEGE OF
EDUCATION

Consider a Bachelor of Science in

Human Development

What is Human Development?

Human development (HD) examines the biological, psychological, sociological, and cultural characteristics of learning and development across the lifespan. HD is similar to psychology, but emphasizes the processes and mechanisms of change in how families, schools, communities, and societies influence individual's thinking and behavior.

What can I do with the degree?

HD provides a strong foundation for a variety of professions and continued graduate training. The major is particularly suitable for working in human service fields such as:

- Education
- Healthcare
- Youth Services
- Public Policy
- Psychology
- Non-Profit
- Law
- Human Resources
- Government Agencies

Why study Human Development at the University of Maryland?

Make a positive impact on the quality of human life

Gain internship experience in your field of interest

Build an interdisciplinary foundation to enhance your career path
