

# The Onzole River Project: Educational empowerment in rural Afro-Ecuadorian communities

An event co-sponsored by the Center for Science and Technology in Education and the Center for Mathematics Education

Daniel Levin, Center for Science and Technology in Education  
Carolina Napp-Avelli, Center for Mathematics Education  
Carlos Vieira, The Onzole River Project

Friday, November 9th, 2018  
11:00 am – 12:00 pm  
Room 2121, Benjamin Bldg.  
(Complementary lunch will be provided after the talk)

Please join us to learn about the work of the Onzole River Project, a non-profit organization dedicated to bringing educational empowerment to rural Afro-Ecuadorian communities along the Onzole River in the remote Northwestern Ecuadorian rainforest. Dan Levin and Carolina Napp-Avelli, faculty members in the Center for Mathematics Education and Center for Science and Technology in Education, have worked in one of these communities. Along with the director of the Project, Carlos Vieira, they will present videos, pictures, and descriptions of the positive efforts being made by community members and visiting educators to bring knowledge and resources to help empower and equip young people who will lead this community into the future.

We look forward to sharing this time with you!
