

Parental Views on the Math Education of Autistic Children

This research study is conducted by Dr. Gulnoza Yakubova and her team at the [Technology, Interventions, and Inclusion in Autism \(TIIA\) Lab](#) at the University of Maryland, College Park.

We are interested in parents' perceptions and experiences about their child's math education.

Who Can Participate?

Parents or primary caregivers who:

- Have an autistic child in k–12 grades in public schools in the US.
- Self-identify as being from a cultural/racial/ethnic minority group.
- Live in the U.S.
- Are able to communicate in English.

Your child's mathematics education is the focus of our study.

What Will You Do?

- Answer a brief demographic survey (5–10 minutes)
- Participate in an **online semi-structured interview** (approximately 60 minutes) where you'll share your experiences, insights, and perceptions on the mathematics education of your child. **Audio recording of the interview is required in this project.**
- Upon successful completion of the online interview, you will receive a \$15 electronic gift card.

How Will This Help?

Your contribution can help improve the math learning experiences of autistic children. This understanding will guide us in improving mathematics education and practices as well.

Interested?

Fill out the brief eligibility screening questionnaire (approximately 3–5 minutes):
