

What is the least amount of trash you can make??

The CYC Green Committee Announces School Wide —

Trash Free Tuesdays

Teachers and Students, we challenge you to bring a lunch with the smallest amount of trash possible!

- 1-Buy in bulk and fill washable containers
- 2-Bring a cloth napkin or washcloth for spills
- 3-Pack a reusable drink bottle

The average American school-age child throws away 67 pounds of lunch waste a year. With the population of kids in the US alone accounting for over 70 million, that's over 4.6 billion pounds of waste that could be easily avoided. (wastefreelunches.org)

When there is a choice, choose reusable over recyclable. (greenlivinqtips.com)

1.5 million barrels of oil are used in making plastic baggies and plastic bottles each year (Sierra Club)

Avoid purchasing pre-packaged items. Buy foods in larger containers and leave them at home for recycling. (EPA)

Starting - Tuesday, January 15 !
