Scaffolding is a challenging task in elementary classrooms. Drawing on a research study, the presenter describes how a first grade teacher utilized a language-based approach to content instruction (LACI) to provide scaffolding to support emergent to advanced bilinguals’ literacy learning. LACI is a teacher education model developed over the past 12 years in elementary and secondary classrooms in the United States.

Luciana C. de Oliveira, Ph.D., is Professor and Chair in the Department of Teaching and Learning in the School of Education and Human Development at the University of Miami, Florida. Her research focuses on issues related to teaching English language learners (ELLs) at the K-12 level, including the role of language in learning in the content areas and teacher education, advocacy and social justice. Currently, Dr. de Oliveira’s research examines scaffolding in elementary classrooms and multimodal representation in picture books. She is the author or editor of 21 books and over 180 publications in various outlets. She is President (2018-2019) of TESOL International Association.
